Detail view

Parcel

Area size	390,000 m²
Availability	Available area within medium term (2-5 years)
Divisible	Yes
24h operation	No

Industriegebiet "Westfalen"**Ort: Lippetal**www.germansite.de**Details on commercial zone**

The municipality of Lippetal intends to develop an industrial zone near the junction of the A2 freeway. The industrial zone is to be connected to the "Westfalen" power plant via a process steam pipeline. A feasibility study on supplying the planned area with process heat is available. In addition to the supply of process heat, the industrial zone will also have a good broadband connection. Due to the proximity of the power plant, the supply of all its other products is also ensured.

Area type MI / GI
